

Sell on CLM

Background

With today's hectic schedules a busy parent needs a reputable online shop which they can trust to bring them a collection of beautiful bedroom furniture, decor and clever products needed to create that special environment for their child.

Clever Little Monkey is focused on providing innovative products and irresistible bedroom furniture and décor. We promote products which are manufactured using natural/eco-friendly or sustainable materials such as wood, metal and cotton. Most products are manufactured locally, hand-crafted, hand-painted and filled with love. Our products are as eco-friendly as possible; using only water-borne paints and sustainable resources. Some of our other designer listed products are absolute must-haves for their usefulness or they are imported for their beauty and quality.

CLM has been involved in designing an up-market contemporary furniture range which has been featured in the design world. We are also collaborating with other young and upcoming designers to create a look never before seen which will put SA right on the map of international children's design. This year we have launched Designers Platform with Baba Indaba to promote hot new products for children from various SA designers. We will be looking at further ways to promote these products at South African and international exposition. So please contact us if you would be interested in getting involved.
